

Kevin Slavin, MFA

Advisor, Poppy, Advisor, Phylagen, Lead, Pandemic Task Force and Vice Principle, Crossover Health, Principal Investigator, MIT Media Lab, Chief Science and Technology Officer, The Shed
speaker bio

Kevin Slavin is a serial entrepreneur, senior executive, and designer whose work has pioneered novel intersections between digital systems and the physical world—from location-based games to pathogen-sensing bees.

In 2021, Kevin began actively advising Poppy, and is leading Marketing and Creative for the US/Canadian startup pioneering indoor environmental pathogen sensing. Poppy's work in using next generation technology to sense pathogens in the air is setting new standards for the knowledge and action to mitigate risk in major multinational corporate offices, cultural institutions, coworking spaces and even airports.
