

Distance-Accessible NP Education: Successes and Challenges of Preceptor Onboarding

Michele Talley, PhD, ACNP-BC, FAANP

Ashley Hodges, PhD, WHNP-BC, FAANP

*Presenters state no actual or
perceived conflict of interest*

Learning Objective

Upon completion of this presentation, the learner will be able to identify two factors that threaten the quality of the precepting experience for nurse practitioner students and two strategies for ensuring proper preceptor onboarding and oversight.

Background

Distance-Accessible BSN to DNP Programs

- Increasing enrollment
- Increasing demand for preceptors

UAB SCHOOL OF NURSING
The University of Alabama at Birmingham

5

Distance-Accessible BSN to DNP Programs

- Interested nurses depend on:
 - Quality education
 - Rich clinical practicum experiences

UAB SCHOOL OF NURSING
The University of Alabama at Birmingham

6

Rich Clinical Experiences

- Require increase in collaboration between education and practice
- Fundamental part of NP education
- Application of knowledge
- Highly dependent on quality of preceptor

UAB SCHOOL OF NURSING
The University of Alabama at Birmingham

7

Many Factors Threatening Quality of Preceptor

- Preceptor perspective:
 - Barriers
 - Time constraints
 - Space constraints
 - Priority to increase patient volume
 - Timely and quality documentation in electronic health record
 - Lack of administrative support
 - Inadequate staffing

Roberts, M., Wheeler, K., Tyler, D. & Padden, D. (2017). Precepting nurse practitioner students: A new view-Results of two national surveys of nurse practitioner preceptors. *JANP*, 29, 484-491.

8

Many Factors Threatening Quality of Preceptor

- Faculty perspective:
 - Little agreement on how to best orient a preceptor
 - Little agreement on how to ensure a quality experience for NP students or provide preceptor oversight
 - Extreme concern with obtaining clinical sites and qualified preceptors

American Association of Colleges of Nursing. (2015). *White paper: Current state of APRN clinical education*. Washington DC: Author.

12

Seek Input

- From students
- From faculty
- From preceptors

UAB SCHOOL
OF NURSING
The University of Alabama at Birmingham

13

Faculty Must Understand Preceptor Perspective

- Understand barriers and motivators
- Be innovative to engage preceptors

UAB SCHOOL
OF NURSING
The University of Alabama at Birmingham

14

Develop Tools

- For UAB School of Nursing:
 - Graduate Clinical Programs Advanced Practice Toolkit for Faculty and Preceptors
 - Preceptor Portal

UAB SCHOOL OF NURSING
The University of Alabama at Birmingham

15

Resources and Opportunities

- NONPF
- AACN
- HRSA ANEW

UAB SCHOOL OF NURSING
The University of Alabama at Birmingham

16

Seek Feedback and Improve Quality

- Get feedback:
 - From students
 - From preceptors
 - From faculty
- Engage faculty in assisting with the quality improvements

UAB SCHOOL OF NURSING PRECEPTOR

Graduate nursing education provides the academic preparation and skills necessary for role development in advanced nursing practice. Students start their inquiry into advanced nursing in classroom theory courses, followed by a step-wise integration into practice under the dual supervision of community-based preceptors and faculty instructors. The step-wise integration into practice means that students rehearse decision-making and intervention skills in practice-oriented courses, which build upon the knowledge acquired in the classroom. The dual oversight of the preceptor and the faculty instructor will ensure that students achieve the necessary steps of practice and make successful transitions.

- + Q: How often should I expect to hear from the student's instructor?
- + Q: What is expected of me as a preceptor?
- + Q: What is expected of the student?
- + Q: What is expected of the School of Nursing Faculty?

26

The role of a preceptor

The purpose of the experience is to provide the nurse practitioner student with an opportunity to participate in:

- health assessment of patients
- counseling and guidance in accordance with identified needs
- management of the care of patients in consultation with the preceptor.

The student is expected to consult with the preceptor regarding each patient seen and to record the visits in the format appropriate to the clinic's standards. At all times, the student functions under the supervision of the preceptor.

Preceptors also:

- Agree to accept responsibility for a nurse practitioner student for a specified time.
- Generally, develop a learning environment for the student that includes:
 - Sufficient exam rooms so the student may function at a novice pace.
 - Opportunities to do histories and physical exams, make a tentative assessment, present orally to you, propose appropriate diagnoses and therapeutic plans, and write up the encounter as part of the permanent chart/record.
 - Follow-up with the patient by the preceptor who will critique the proposed assessment and care plan.
- Opportunity for the student to observe or participate in managing patients within their scope of practice who present with a problem of general educational interest.
- Guidance in performing clinical procedures that are consistent with the student's learning objectives while under the supervision of the preceptor.
- If deemed necessary by the preceptor or faculty, a brief meeting at your clinic with the academic faculty/instructor overseeing the student's work.
- Help clinic staff understand that the nurse practitioner student will function as a health care provider.
- Provide feedback to the faculty on the student(s).

Benefits of being a preceptor
