

SUPPORT COMMUNITY PARAMEDICINE BY SUPPORTING SENATE BILL 2028

**ACCESS to QUALITY,
CONVENIENT CARE
should be a RIGHT,
not a LUXURY.**

Bartlett, TX needs improved access to healthcare services.

**Percentage of
Bartlett, TX
residents living
under the poverty
line**

**Percentage of the
U.S population
living under the
poverty line**

**Impoverished communities like Bartlett
often do not receive extra money for
healthcare services due to competition
with larger cities for funding.**

**ISSUE: Scarce health services
within Bartlett has led to declined
health autonomy of community
members and exhaustion of
volunteer emergency response
services.**

**GOAL: Promote the adoption of a
state-wide policy that will expand
Medicaid managed care and
provide beneficiaries access to
paramedicine services**

**Current Medicaid coverage does
not cover community
paramedicine services for rural
residents. This lack of coverage to
underserved communities leads
to increased barriers to primary
and preventative services.**

**Support for Senate Bill 2028 will
raise awareness to broaden
access to care for rural residents
so that they can receive
convenient care and not worry
about transportation or coverage.**
