The Honorable Tammy Baldwin  The Honorable Shelley Moore Capito  
Chair  
Senate Appropriations Subcommittee on Labor, Health and Human Services, 
Education & Related Agencies  
Washington DC 20510  

The Honorable Robert Aderholt  The Honorable Rosa DeLauro 
Chair  
House Appropriations Subcommittee on Labor, Health and Human Services,  
Education & Related Agencies  
Washington, DC 20515  

Dear Chair Baldwin, Ranking Member Capito, Chair Aderholt, and Ranking Member DeLauro:

As organizations dedicated to improving the health of all women, children, and families, we strongly urge you to support at least $1 billion for the Title V Maternal and Child Health (MCH) Services Block Grant in the FY2025 Labor, Health and Human Services, Education & Related Agencies Appropriations bill, reflecting increases for both the state formula fund as well as Special Projects of Regional and National Significance (SPRANS).

According to the Centers for Disease Control and Prevention (CDC), approximately 700 pregnancy-related deaths occur in the U.S. each year, and more than 80 percent of these deaths are preventable. Further, CDC recently released provisional data indicating that the total infant mortality rate in the U.S. increased by 3% from 2021-2022, and additional CDC data show a marked increase in maternal deaths during the pandemic. The Title V MCH Block Grant is the only federal program of its kind devoted solely to improving the health of all women and children.

The Title V MCH Block Grant is a cost-effective, accountable, and flexible funding source that addresses the most critical, pressing, and unique needs of maternal and child health populations in all 50 states, the District of Columbia, and each territory. State health departments use the Title V MCH Block Grant to design and implement a wide range of statewide and community-level maternal and child health programs to fit the needs of their specific populations. According to data gathered by the Health Resources and Services Administration (HRSA), Title V MCH Block Grant funding provided access to health care and public health services for an estimated 61 million people in FY22, including 99% of infants, 93% of all pregnant people, and 61% of children nationwide.
While programming varies among states, areas of focus among Title V MCH programs include reducing maternal mortality, infant mortality, stillbirth, and preventable diseases among children; advancing health equity and eliminating racial, ethnic, and geographic inequities in maternal and child health outcomes; assuring access to quality maternal and child health services, especially for families with incomes below the federal poverty level or who live in areas with limited availability of health services; and promoting family-centered, community-based, coordinated care for children with special health care needs. These programs ensure people receive preventive services to avoid more costly chronic conditions later in life, thereby saving federal and state governments money.

Further, the SPRANS portion of the Title V Block Grant, particularly its flexibility, is an essential component to achieving Title V’s mission of ensuring the health of the nation’s mothers, women, children and youth, including children and youth with special health care needs, and their families. In FY 2023, $212.1 million in SPRANS funding supported the work of 201 grantees across 59 states and jurisdictions by funding innovation, training and workforce, technical assistance, quality improvement, and other mission-critical efforts, including genetics services, newborn screening, and treatments for sickle cell disease and hemophilia. A loss of SPRANS funding could detrimentally impact MCH populations, providers, public health professionals, and trainees in a sweeping way.

The MCH workforce and programs need sustained, increased investment to best serve the nation’s maternal and child health populations now and into the future. While we were disappointed to see a decrease in funding for the Title V MCH Block Grant to $813.7 million in FY 2024, we are grateful that Congress completed its FY 2024 appropriations work. Moving forward, we urge you to provide an increase to at least $1 billion in FY2025, including robust increases in both the state formula fund and for SPRANS, to promote sustainable public health programs centered on the needs of our nation’s women, children, and families. For additional information on MCH programs in your state, please contact Sherie Lou Santos at the Association of Maternal & Child Health Programs at 202-964-2411 or ssantos@amchp.org.
