IMPACT NEW STUDENT LOAN LIMITS HAVE ON NURSING⁴

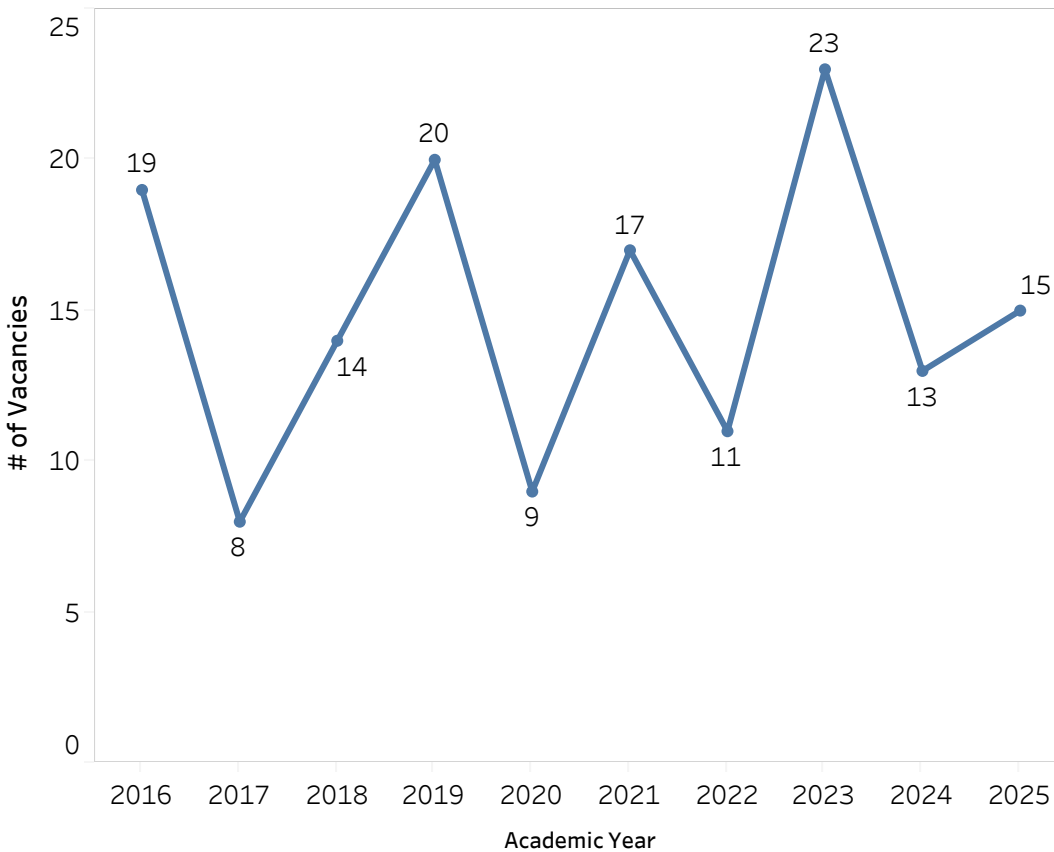

Public Law 119-21-One Big Beautiful Bill Act established new borrowing limits that differentiate between graduate (\$20,500 annual/\$100,000 aggregate) and professional (\$50,000 annual/\$200,000 aggregate) degrees. The Department of Education is currently undergoing a rulemaking process that does not define nursing as a professional degree and would result in insufficient federal student loan limits if finalized as written.

- 78% of Deans** Agree that the annual graduate loan limits would negatively impact post-baccalaureate enrollment.
- 77% of Deans** Believe the graduate loan limits would negatively impact their faculty.
- 71% of Deans** Anticipate that the graduate loan limits will have negative downstream consequences on their baccalaureate enrollment.
- 81% of Students** Say that the aggregate graduate loan limit would negatively impact their ability to finance their education.

UNDERSTANDING THE FACULTY SHORTAGE⁵

Faculty shortage is an obstacle to expanding the nation's nursing workforce and meeting health care demands. Budget constraints, an aging faculty, and finding faculty with the necessary teaching experience are a few examples that contribute to this issue. This data provides an overview of the scope of the nursing faculty shortage at the state level.
