## Introduction

Since the release of the 2008 APRN Consensus Model: Licensure, Accreditation, Certification, and Education, the nurse practitioner (NP) community has been undertaking efforts to ensure congruence with the model. Within education, NP programs have focused on changes to align educational tracks with the NP populations delineated in the model. National organizations have supported these efforts through collaborative work on the NP competencies that guide curriculum development. In 2011, a multi-organizational task force embarked on the challenge to identify competencies for many of the NP population foci: Family/Across the Lifespan, Neonatal, Pediatric Acute Care, Pediatric Primary Care, Psychiatric-Mental Health, and Women's Health/Gender-Related. Although there had previously been developed adult-gerontology competencies in acute care and primary care, those competencies were set within a previous framework of domains. This document presents the updated adult-gerontology acute care and primary care NP competencies within the same framework as the other population-foci NP competencies document. These competencies explicate the unique characteristics and role of the adult-gerontology population focus in acute care and primary care and are designed to augment the NP core competencies.

## Background

The National Organization of Nurse Practitioner Faculties (NONPF) released the first set of core competencies for all nurse practitioners in 1990 and subsequently has revised them in 1995, 2000, 2002, 2006, 2011, and 2012. Recognizing the need to give NP programs further guidance in an area of focus, NONPF, in collaboration with the American Association of Colleges of Nursing (AACN), facilitated the development of the first sets of population-specific competencies. In 2002, a national panel completed the work to identify competencies in the NP primary care areas of Adult, Family, Gerontological, Pediatric, and Women's Health. In 2003, work groups released the Acute Care

Nurse Practitioner Competencies and the Psychiatric-Mental Health Nurse Practitioner Competencies. The development of these population-focused competencies involved a national, consensus process that remains in place today and was used with the 2012 population-focused competencies.

The APRN Consensus Model made a few changes to the population foci for NP educational tracks. Notably, the adult and gerontology foci were merged, and both the adult-gerontology and pediatric foci are distinguished as being primary care or acute care. In addition, the Consensus Model stipulates that the Psychiatric-Mental Health focus crosses the lifespan. Competencies specific to these newly defined population foci did not exist. In 2011 with funding from The John A. Hartford Foundation, AACN, in collaboration with NONPF, delineated the first set of adult-gerontology competencies in primary care and acute care. Recognizing the need for competencies that align with each population foci in the Model, NONPF convened a national task force in 2011 to review previous work and delineate updated entry-level competencies for the remaining population foci. NONPF and AACN recognized the need to revisit the adult-gerontology competencies to present them within the same framework as the other population foci to make it easier for faculty to cross-walk competencies across the NP curriculum. From 2015-2016, the joint work group reviewed and updated the adult-gerontology competencies.

The work group includes representatives of both AACN and NONPF with expertise in adult-gerontology ACNP and/or PCNP curriculum development. The work group formed subgroups to identify the competencies for each population focus and also convened periodically as a whole for discussion. The work group invited review of the competencies in an external validation process, and the final competencies reflect the feedback obtained in this step.

## The APRN Core

The APRN Consensus Model stipulates that an APRN education program must include at a minimum three separate comprehensive graduate-level courses known as the APRN core. The APRN core consists of: advanced physiology/pathophysiology, including general principles that apply across the lifespan; advanced health assessment, which includes assessment of all human systems, advanced assessment techniques, concepts and approaches; and advanced pharmacology, which includes pharmacodynamics, pharmacokinetics and pharmacotherapeutics of all broad categories of agents. In addition to the broad-based content described above, the work group chose to suggest content within the population-focused competencies related to the three core courses as it pertained to the specific population. This was done to illustrate the differences in application of the broad-based core courses as it related to therapeutic management of the various populations.

## The Relationship of the NP Core and Population-Focused Competencies

Each entry-level NP is expected to meet both the NP core competencies and the population-focused competencies in the area of educational preparation. Accordingly, NP educational programs use both NP core competencies and population-focused competencies to guide curriculum development. The NP core competencies are demonstrated upon graduation regardless of the population focus of the program. The competencies are necessary for NPs to meet the complex challenges of translating rapidly expanding knowledge into practice and function in a changing health care environment.

## Other Resource Material for NP Programs

During the development of the population-focused competencies, the task force recognized that other national documents are critical to NP curriculum development. The work force felt it very important to delineate the following as critical resources for refinement of specific skill sets necessary to provide evidence-based, patient-centered care across all settings:

- The Future of Nursing: Leading Change, Advancing Health (IOM, 2011)
- Core Competencies for Interprofessional Collaborative Practice (2011)
- Quality and Safety Education for Nurses (QSEN) Graduate Competency KSAs (2012)
- Essential Genetic and Genomic Competencies for Nurses with Graduate Degrees (2012)
- The Essentials of Master's Education in Nursing (AACN, 2011)
- The Essentials of Doctoral Education for Advanced Practice Nursing (AACN, 2006)
- Integration of Oral Health and Primary Care Practice (HRSA, 2014)

## How to Use This Document

The following pages include both sets of adult-gerontology NP competencies. Each set is presented in a table format to emphasize the relationship of the population-focused competencies with the NP core competencies. The expectation is that an educational program will prepare the student to meet both sets of competencies. The table also presents suggested content to support both the NP core and adult-gerontology competency development.

All text in red indicates recently added competencies (after the original release).

# Adult-Gerontology Acute Care NP Competencies

## Preamble:

These are entry-level competencies for the adult-gerontology acute care nurse practitioner (AG ACNP) and build on the core competencies for all nurse practitioners (NPs).

The AG ACNP provides care to adults and older adults with acute, critical and complex chronic physical and mental illnesses across the entire adult age spectrum from young adults (including late adolescents), to adults and older adults (including frail older adults). AG ACNPs are prepared to provide services ranging from disease prevention to critical care to stabilize the patient's condition, prevent complications, restore maximum health and/or provide palliative care. The AG ACNP practice focuses on patients who are characterized as "physiologically unstable, technologically dependent, and/or are highly vulnerable to complications" (AACN, 2012). These patients require ongoing monitoring and intervention. The patients with acute, critical and complex chronic physical and mental illnesses may be encountered across the continuum of care settings. The scope of practice of the AG ACNP is not setting specific but rather is based on patient care needs. The AG ACNP also coordinates comprehensive care in and across care settings to ensure that the acute and chronic illness needs of patients are met during care transitions.

The AG ACNP program is designed to provide sufficient didactic and clinical experiences to prepare the graduate with the competencies delineated in this document, as well as the NONPF NP Core Competencies and the current AACN Essentials of Doctoral Education for Advanced Nursing Practice. It is expected that faculty assess the types, quality, and length of experiences, adult-gerontology patient populations, and diverse care settings afforded each student to ensure the student is prepared to provide care to the entire adult-gerontology age spectrum and across the acute, critical, and complex care continuum. In addition, the AG ACNP student is expected to have practice opportunities within the program to integrate advanced nursing practice competencies, including leadership skills, understanding of health care systems, and interprofessional team practice into one's practice. Integration of the AC ACNP competencies, NONPF NP Core Competencies, and AACN DNP Essentials across the curriculum of the AG ACNP program is recommended for efficient and effective program design.

See the "Introduction" for how to use this document and to identify other critical resources to supplement these competencies.

- Evaluation of outcomes (for health status of patient and population as well as system outcomes)
- Evaluation of why expected results were or were not attained and lessons learned
- Making recommendations for further work
- Addressing issues of sustainability of project finding

Dissemination of work and findings:

- Abstract and manuscript writing to support the dissemination of project and research outcomes
- Discussion of clinically meaningful results that may or may not be statistically significant
- Presentation skill development with modification for different audiences

Integration of findings:

- Results, methods, and tools, as appropriate, into care delivery
- Identification of best practices
- Opportunities for multidisciplinary team/inter-professional collaboration for patient care
- Development and use of clinical guidelines
- Use of clinical judgment to improve practice
- Application of evidence to validate or change policy

Evaluation of alternative care delivery models and treatments, including costs, cost benefits, and return on investment

Institutional review board policies and processes

Interprofessional research and scholarship exemplars and opportunities

# NP Competency Area: Policy

## NP Core Competencies

## Curriculum Content to Support NP Core Competencies

*Neither required nor comprehensive, this list reflects only suggested content*

## Adult-Gerontology Acute Care NP Competencies

## Curriculum Content to Support AG ACNP Competencies

*Neither required nor comprehensive, this list reflects only suggested content specific to the population*

Proactive and responsive use of media

Barriers to NP practice

Legislative process and resources, e.g., Congress.gov

Policy theories

Examples of policy making at multiple levels and individual and collective contributions to shape policy

Challenges to optimal care created by competing priorities of patients, payers, providers, and suppliers

Strategies for participation in the development and implementation of institutional, local, state, and federal policy that reduces biases against:

- Ageism
- Gender
- Race
- Developmental status
- Health status
- Sexual orientation and identification

- Research and quality improvement
- Continuous quality improvement
- Quality and Safety Education in Nursing

### Transitional care:

- Navigating transitions across health care settings
- Coordination of services

### Planning, delivering and/or evaluating models of care:

- Models of planned change
- Process and evaluation design implementation
- Evaluation models
- Process of proposing changes in practice

### Legislative and regulatory issues:

- Relevant and current issues, e.g., Accountable Care Act implementation
- Process of health care legislation
- Scope and standards of practice
- Cultural competence
- Theories of vulnerability
- Social determinants of health

### Policy and advocacy:

- Reducing environmental health risks
- Implications of health policy
- Variations in policy

11. Applies knowledge of the type and level of services provided across complex health care and residential settings.
12. Demonstrates sensitivity to diverse organizational cultures and populations.
13. Facilitates patient and family navigation of complex health care systems.

## Curriculum Content to Support AG ACNP Competencies

*Neither required nor comprehensive, this list reflects only suggested content specific to the population*

- pharmacogenetic risks, complex medical regimens, drug interactions and other adverse events.
17. Prescribes medications maintaining awareness of and monitoring for adverse drug outcomes and complex medical regimens, especially in high-risk and vulnerable populations.
  18. Uses pharmacologic and non-pharmacologic management strategies to ameliorate physical and behavioral symptoms in individuals who have mental health and substance misuse disorders.
  19. Initiates discussion of sensitive issues, such as advanced directives and end-of-life decisions, with the individual, family and other caregivers.
  20. Applies principles of crisis and stress management in assisting the patient and family experiencing complex acute, critical, and chronic physical and mental illness during changes in status.
  21. Adapts teaching-learning approaches based on physiological and psychological changes, age, developmental stage, cognitive status, readiness to learn, health literacy, the environment, and available resources.
  22. Coordinates comprehensive care in and across care settings for patients who have acute and chronic illness needs.
  23. Promotes the delivery of evidence-based care for patients with complex acute, critical, and chronic physical and mental illness.
  24. Practices within the national, state, and institutional credentialing and scope of practice for AG ACNPs based upon education, certification, and licensure criteria.

to:

- Multiple caregivers
- Continuity of care
- coordination of the plan of care across levels and settings of care
- Complex medical regimens
- Low or poor health literacy
- Communication with family or between multiple care providers

Assessment of acute and chronic mental health and behavioral problems and disorders, adapting for the cognitively impaired

Assessment of individuals with complex health issues and co-morbidities, including the interaction with aging and acute and chronic physical and mental health problems

The relationship among development, normal physiology, and specific system alterations that can be produced by aging and/or disease processes.

Assessment of the individual's and support system's ability to cope with and manage developmental (life stage) transitions.

Safety and efficacy of pharmacologic, behavioral, and other therapeutic interventions, including but not limited to:

- Over-the-counter medications
- Complementary alternatives
- Patient's and caregiver's ability to self-manage medications safely and correctly

Medication management, maintaining awareness of and monitoring for adverse drug outcomes and complex medical regimens, especially in high-risk and vulnerable populations

Age-specific assessment tools such as:

- MoCA

- SLUMS
- Mini Cog
- GDS
- PHQ-9
- GMAST
- CAM-ICU
- CIWA

Assessment of syndromes and constellations of symptoms that may be manifestations of other common health problems including, but not limited to:

- Risk-taking behaviors
- Stress
- Self-injury
- Incontinence
- Falls
- Dementia
- Delirium
- Depression

Assessment of genetic risk factors associated to the patient's acute and chronic health conditions

Application of:

- Knowledge related to rapidly changing pathophysiology of acute and critical illness in the planning of care and implementation of treatment and referrals
- Pharmacologic and nonpharmacologic treatment modalities considering age and genetic profile
- Prescription and monitoring of a variety of allied health therapies, including, but not limited to:
  - Physical therapy
  - Occupational therapy
  - Speech therapy
  - Home health care
  - Palliative care
  - Nutritional therapy
- Knowledge related to cultural, spiritual, ethnic, gender, and age cohort differences in planning and implementing care
- Therapeutic communication techniques

Identification of one's personal biases related to culture, aging,

gender, development, and independence that may affect the delivery of quality care

Diagnosing, discussing, identifying risk, including, but not limited to:

- Suicide prevention, self-injury
- Addictive behavior risk
- Risk-taking behavior, e.g. drinking and driving
- Violence, neglect, abuse, and mistreatment
- Prognosis
- Institutionalization

Organ tissue donation

Fluid and electrolyte stabilization to include:

- Modes of fluid administration
- Types of solutions
- Transfusion therapies

Assessment of patient volume status (invasive and noninvasive) including, but not limited to: ultrasound and hemodynamic monitoring, e.g. esophageal Doppler cardiac output monitoring, ultrasonic cardiac output monitoring, bioreactive bioimpedance cardiography, pulse contour analysis, stroke volume/pulse pressure variation monitoring, noninvasive near infrared spectroscopy cerebral oximetry monitoring, etc.

Knowledge of professional standards and federal regulatory requirements as related to AG ACNP scope and practice:

- National (e.g., APRN Consensus Model)
- State (regulatory)
- Institutional

Payment for APRN services:

- Reimbursement practices
- Billing and coding

Guiding professional and other caregivers to provide culturally and spiritually sensitive appropriate care

# Adult-Gerontology Primary Care NP Competencies

## Preamble:

These are entry-level competencies for the adult-gerontology primary care nurse practitioner (AG PCNP) and build on the core competencies for all nurse practitioners (NPs). The AG PCNP Competencies are specific to the adult-gerontology population which includes adolescents and young adults at one end of the spectrum and frail, older adults at the other. The student is prepared to provide primary care services to the entire adult-gerontology age spectrum across the continuum of care from wellness to illness, including preventive, chronic, and acute care. The main emphasis of primary care NP educational preparation is on comprehensive, chronic, continuous care characterized by a long term relationship between the patient and AG PCNP. The AG PCNP provides care for most health needs and coordinates additional health care services that would be beyond the AG PCNP's area of expertise. The scope of practice of the AG PCNP is not setting specific but rather is based on patient care needs.

The AG PCNP program is designed to provide sufficient didactic and clinical experiences to

prepare the graduate with the competencies delineated in this document, as well as the NONPF NP Core Competencies and the current AACN Essentials of Doctoral Education for Advanced Nursing Practice. It is expected that faculty assess the types, quality, and length of experiences, adult-gerontology patient populations, and diverse care settings afforded each student to ensure the student is prepared to provide care to the entire adult-gerontology age spectrum and across the continuum of care from wellness to illness. In addition, the AG PCNP student is expected to have practice opportunities within the program to integrate advanced nursing practice competencies, including leadership skills, understanding of health care systems, and interprofessional team practice into one's practice. Integration of the AG PCNP competencies, NONPF NP Core Competencies, and AACN DNP Essentials across the curriculum of the AG PCNP program is recommended for efficient and effective program design.

See the "Introduction" for how to use this document and to identify other critical resources to supplement these competencies.

# NP Competency Area: Scientific Foundations

<b>NP Core Competencies</b>	<b>Curriculum Content to Support NP Core Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content</i>	<b>Adult-Gerontology Primary Care NP Comps</b>	<b>Curriculum Content to Support AG PCNP Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content specific to the population</i>
<ol style="list-style-type: none"> <li>1. Critically analyzes data and evidence for improving advanced nursing practice.</li> <li>2. Integrates knowledge from the humanities and sciences within the context of nursing science.</li> <li>3. # NP Competency Area: Leadership

<b>NP Core Competencies</b>	<b>Curriculum Content to Support NP Core Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content</i>	<b>Adult-Gerontology Primary Care NP Comps</b>	<b>Curriculum Content to Support AG PCNP Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content specific to the population</i>
<ol style="list-style-type: none"> <li>1. Assumes complex and advanced leadership roles to initiate and guide change.</li> <li>2. Provides leadership to foster collaboration with multiple stakeholders (e.g. patients, community, integrated health care teams, and policy makers) to improve health care.</li> <li>3. Demonstrates leadership that uses critical and reflective thinking.</li> <li>4. Advocates for improved access, quality and cost effective health care.</li> <li>5. Advances practice through the development and implementation of innovations incorporating principles of change.</li> <li>6. Communicates practice knowledge effectively, both orally and in writing.</li> <li>7. Participates in professional organizations and activities that influence advanced practice nursing and/or health outcomes of a population focus.</li> </ol>	<p><b>Content related to:</b></p> <ul style="list-style-type: none"> <li>• Crisis management and leadership</li> <li>• Stress management (for staff and patient/family)</li> <li>• Teams and teamwork, including team leadership, building effective teams, and nurturing team</li> </ul> <p>Leadership, change, and management theories with application to practice</p> <p>Political processes, political decision making processes, and health care advocacy</p> <p>Problem solving:</p> <ul style="list-style-type: none"> <li>• Influencing and negotiation</li> <li>• Conflict management</li> <li>• Strategic thinking</li> <li>• Managing change</li> </ul> <p>Business development:</p> <ul style="list-style-type: none"> <li>• High reliability organization principles</li> <li>• Building and maintaining effective teams</li> <li>• Project management concepts</li> <li>• Principles of effective decision making</li> <li>• Principles of change management</li> <li>• Civility</li> <li>• Principles of innovation</li> </ul> <p>Communications:</p> <ul style="list-style-type: none"> <li>• Scholarly writing, manuscript, and abstract preparation</li> <li>• Structuring and presenting persuasive arguments</li> </ul> <p>Peer review:</p> <ul style="list-style-type: none"> <li>• Publications</li> <li>• Presentations</li> <li>• Research</li> <li>• Practice</li> </ul> <p>Leadership development:</p> <ul style="list-style-type: none"> <li>• Skills to influence decision-making bodies at the system, state, or national level</li> <li>• Interprofessional leadership</li> </ul>	<ol style="list-style-type: none"> <li>1. Describes the current and evolving adult-gerontology primary care NP role to other health care providers and the public.</li> <li>2. Provides leadership to facilitate the complex coordination and planning required for the delivery of care to young adults (including late adolescents), adults, and older adults.</li> <li>3. Demonstrates leadership in the practice and policy arenas to achieve optimal care outcomes for the adult-gerontology population</li> </ol>	<p>Content related to:</p> <ul style="list-style-type: none"> <li>• Planning, delivery, and evaluation of care by the health care team</li> <li>• Teaching and coaching to improve the plan of care and health care outcomes</li> <li>• Promoting improved health care outcomes for young adult (including late adolescents), adult, older adults in practice, policy, and other venues</li> </ul> <p>Community and professional organizations involvement to</p> <ul style="list-style-type: none"> <li>• Promote access to care for the population(s) served</li> <li>• Advocate on behalf of the adult-gerontology population.</li> <li>• Promote adult-gerontology NP and advanced practice nursing roles</li> </ul> <p>Knowledge of adult-gerontology and adolescent health care team building strategies</p> <p>Coalition building for advocacy and improvement of care for the adult-gerontology population</p> <p>Leadership role in recognizing and planning for aging population health needs</p>

# NP Competency Area: Leadership

## NP Core Competencies

## Curriculum Content to Support NP Core Competencies

*Neither required nor comprehensive, this list reflects only suggested content*

## Adult-Gerontology Primary Care NP Comps

## Curriculum Content to Support AG PCNP Competencies

*Neither required nor comprehensive, this list reflects only suggested content specific to the population*

- Assuming leadership positions in professional, political, or regulatory organizations
- Structure and functions of editorial/board roles
- Ethical and critical decision making, effective working relationships, and a systems-perspective

Concepts of strategic planning process

Leadership styles

How to lead change in practice, manage practice changes

- Monitoring implementation and fidelity
- Adaptation of change to patients, providers and organizational needs and resources
- Interim feedback on achievements and efficiencies
- Interpretation of data and articulating evidence,

Self-reflection of leadership style e.g., personal leadership strengths and weaknesses; working with diverse skills sets and diverse teams

# NP Competency Area: Quality

<b>NP Core Competencies</b>	<b>Curriculum Content to Support NP Core Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content</i>	<b>Adult-Gerontology Primary Care NP Comps</b>	<b>Curriculum Content to Support AG PCNP Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content specific to the population</i>
<ol style="list-style-type: none"> <li>1. Uses best available evidence to continuously improve quality of clinical practice.</li> <li>2. Evaluates the relationships among access, cost, quality, and safety and their influence on health care.</li> <li>3. Evaluates how organizational structure, care processes, financing, marketing, and policy decisions impact the quality of health care.</li> <li>4. Applies skills in peer review to promote a culture of excellence.</li> <li>5. Anticipates variations in practice and is proactive in implementing interventions to ensure quality</li> </ol>	<p>Quality Safety Education in Nursing (QSEN) principles and content</p> <p>Evaluation of outcomes of care such as quality improvement projects with an evaluation component</p> <p>Reflective practice Culture of safety</p> <p>Quality improvement processes and practices</p> <p>Knowledge of quality improvement methods such as:</p> <ul style="list-style-type: none"> <li>• Plan-Do-Study Act</li> <li>• Six Sigma</li> </ul> <p>Cost benefit analysis</p> <p>Peer review process</p> <ul style="list-style-type: none"> <li>• Reviewer</li> <li>• Reviewee</li> </ul> <p>Collaborative team processes and practices</p> <p>Leadership skills for leading change for quality clinical practice</p> <p>Methods and measures of quality assurance during transitions of care</p> <p>Laws and rules to enhance quality such as:</p> <ul style="list-style-type: none"> <li>• Meaningful use</li> <li>• Federal, state, and local quality data sources and indicators</li> </ul>	<ol style="list-style-type: none"> <li>1. Promotes safety and risk reduction for the adult-gerontology population</li> <li>2. Evaluates the quality of care delivery models and their impact on adult population outcomes across the age and care continuum.</li> <li>3. Demonstrates continuous quality improvement of one's own practice.</li> </ol>	<p>Effectiveness of processes and interventions to ensure safety and prevent errors such as:</p> <ul style="list-style-type: none"> <li>• Devices to promote mobility and prevent falls</li> <li>• Cognitive and sensory enhancements</li> <li>• Restraint-free care</li> <li>• urinary catheters</li> <li>• Medication reconciliation</li> <li>• Adaptive equipment</li> </ul> <p>Effectiveness of care delivery models across different settings to include:</p> <ul style="list-style-type: none"> <li>• Accountable care organizations</li> <li>• Aare transitions</li> <li>• Disease management</li> <li>• Patient-centered medical home</li> <li>• Medication management</li> </ul> <p>Evidence- based practice principles for each stage of aging from adolescence to frail older adult</p> <p>Use of nationally accepted quality measures and benchmarks for primary care environments.</p>

# NP Competency Area: Practice Inquiry

<b>NP Core Competencies</b>	<b>Curriculum Content to Support NP Core Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content</i>	<b>Adult-Gerontology Primary Care NP Comps</b>	<b>Curriculum Content to Support AG PCNP Competencies</b> <i>Neither required nor comprehensive, this list reflects only suggested content specific to the population</i>
<ol style="list-style-type: none"> <li>1. Provides leadership in the translation of new knowledge into practice.</li> <li>2. Generates knowledge from clinical practice to improve practice and patient outcomes.</li> <li>3. Applies clinical investigative skills to improve health outcomes.</li> <li>4. Leads practice inquiry, individually or in partnership with others.</li> <li>5. Disseminates evidence from inquiry to diverse audiences using multiple modalities.</li> <li>6. Analyzes clinical guidelines for individualized application into practice</li> </ol>	<p>Leadership for role in practice improvement</p> <p>Clinical investigation strategies:</p> <ul style="list-style-type: none"> <li>• Identifying clinical practice problems</li> <li>• Appraising evidence for application to practice (e.g., design, methods, tools, analysis)</li> <li>• Literature search methods, including, but not limited to, the MeSH search for the best clinical evidence and the PICO Model to define clinical questions</li> </ul> <p>Use of electronic databases, such as electronic health records:</p> <ul style="list-style-type: none"> <li>• Assessing clinical practice</li> <li>• Reviewing patient technology</li> <li>• Exploring behaviors and risk factors</li> <li>• Using data to support evidence based changes in clinical management</li> <li>• Template development</li> </ul> <p>Patient management, including, but not limited to, discerning gaps in care and barriers to care needing resolution during patient encounters</p> <p>Project development and management:</p> <ul style="list-style-type: none"> <li>• Synthesis and translation/ extrapolation of research to selected populations</li> <li>• Frameworks to guide projects</li> <li>• <b>Quality improvement methods</b></li> <li>• Assessment of resources needed and available for projects</li> <li>• <b>Competing priorities of patients, payers, providers, and suppliers</b></li> <li>• Data-based, needs assessment for project</li> <li>• Processes used in conducting projects based on current and best evidence, including evaluation of the application of evidence or inquiry to the population of concern</li> </ul>		<p>Methods of evaluating clinical data related to individual and population such as</p> <ol style="list-style-type: none"> <li>a. Decline in physical or mental function</li> <li>b. Impaired quality of life</li> <li>c. Social isolation</li> <li>d. Excess disability</li> </ol> <p>National clinical practice guidelines to evaluate clinical practice outcomes for the adult-gerontology population in primary care.</p> <p>Information databases specific to the adult-gerontology population</p> <p>Identification of emerging areas for clinical research based on new, evolving AG PCNP practice</p>

- Evaluation of outcomes (for health status of patient and population as well as system outcomes)
- Evaluation of why expected results were or were not attained and lessons learned
- Making recommendations for further work
- Addressing issues of sustainability of project finding

Dissemination of work and findings:

- Abstract and manuscript writing to support the dissemination of project and research outcomes
- Discussion of clinically meaningful results that may or may not be statistically significant
- Presentation skill development with modification for different audiences

Integration of findings:

- Results, methods, and tools, as appropriate, into care delivery
- Identification of best practices
- Opportunities for multidisciplinary team/inter-professional collaboration for patient care
- Development and use of clinical guidelines
- Use of clinical judgment to improve practice
- Application of evidence to validate or change policy

Evaluation of alternative care delivery models and treatments, including costs, cost benefits, and return on investment

Institutional review board policies and processes

Interprofessional research and scholarship exemplars and opportunities

- Research and quality improvement
- Continuous quality improvement
- Quality and Safety Education in Nursing

### Transitional care:

- Navigating transitions across health care settings
- Coordination of services

### Planning, delivering and/or evaluating models of care:

- Models of planned change
- Process and evaluation design implementation
- Evaluation models
- Process of proposing changes in practice

### Legislative and regulatory issues:

- Relevant and current issues, e.g., Accountable Care Act implementation
- Process of health care legislation
- Scope and standards of practice
- Cultural competence
- Theories of vulnerability
- Social determinants of health

### Policy and advocacy:

- Reducing environmental health risks
- Implications of health policy
- Variations in policy

providers and staff, to revise systems, delivery models, and care practices

age, gender, and health status appropriate

Anticipatory guidance and counseling for individuals and their families based on identified health promotion needs, social support, and health status

Centers for Medicare and Medicaid Services (CMS) rules and regulations for NP billing and coding; use of current codes, such as ICD-10, E&M codes, and site specific codes for billable services

Diagnosis of acute and chronic physical and mental illnesses, disease progression, and patient or family's decision making capacity.

Geriatric syndromes, including, but not limited to:

- Falls
- Loss of functional abilities
- Dehydration
- Delirium
- Depression
- Dementia
- Malnutrition
- Incontinence
- Failure to thrive
- Frailty
- Constipation

Multiple morbidities, psychosocial issues, and financial issues impact health and illness

Presence of multiple morbidities, their impact on presenting health problems, and the risk for iatrogenesis

Sexual and reproductive health and functioning across the adult age spectrum

Anticipated and unanticipated risks and adverse treatment outcomes, non-recognition of treatable illness, and under/ overtreatment.

Local resources for families and adults for adult/gerontology day care facilities to assist with the frail, physically or mentally challenged, or chronically ill adults

Age-specific assessment tools such as:

- MoCA
- SLUMS
- Mini Cog
- GDS
- PHQ-9
- GMAST

Therapeutic interventions to restore or maintain optimal level of physical and psychosocial health

Prescription and monitoring of a variety of allied health therapies, including, but not limited to:

- Physical therapy
- Occupational therapy
- Speech therapy
- Home health care
- Palliative care
- Nutritional therapy

Differences between palliative and hospice care

Specific interventions which involve family, and/or caregivers for acute and chronic clinical problems of the adult and geriatric patient.

Knowledge of physical therapy, occupational therapy, speech therapy, home health, hospice, and nutritional therapy options, and when to refer.

The impact of family, community, and environment, including economic, work, institutional, school, and living environments on an individual's health status

Primary care practice skills which includes, but is not limited to:

- Wound debridement

- Suturing
- Microscopy
- Biopsies
- Pap smears
- Joint aspiration and injection.

Ordering, performing, and supervising laboratory diagnostic testing, and clinical procedures, and interpreting results in relation to the individual's age, gender, and health status

Appropriate patient education materials for adult and geriatric patients and their families

Health education and appropriate teaching/learning methods for:

- Sensory impaired
- Cognitively impaired
- Non-self-disclosing patients
- Ethical/legal standards of care
- Use of interpreters

Interaction of acute and chronic physical and mental health problems and when to hand -off to acute care colleagues

"Transition of care theory" hand-off and reporting communication and necessary forms , e.g., advance directives, and medication reconciliation

Community based activities that highlight the AG PCNP role

Involvement with interdisciplinary adult and geriatric professional associations

Analysis of the practice laws for NPs and other health care professionals in various settings such as:

- Skilled nursing facilities
- Assisted living facilities
- Rehabilitation facilities
- Hospice
- Telehealth-like systems

Knowledge of state laws regarding the long term care
