

CDC Public Health Informatics Fellowship Program

Recruitment Webinars

Become a CDC data detective. Get applied public health informatics training and use your computer science and information technology skills to investigate and solve public health problems. The CDC Public Health Informatics Fellowship Program (PHIFP) application period is open now through November 4, 2018. Make plans to join a one-hour, informative webinar session to learn more about PHIFP!

This is a 2-year, competency-based training program that provides public health informatics training for doctoral-or master's-level professionals. Fellows are placed in assignments in centers and offices across CDC where they gain experiential training to address current and future informatics needs in public health.

Don't miss this exciting opportunity to learn more about how you can become a data detective as a PHIFP fellow and:

- Work with teams in research and development of public health information systems
- Provide informatics assistance to partners
- Plan and evaluate complex information systems, such as disease surveillance systems

Presenters:

Sridhar Papagari-Sangareddy, Program Lead and Jina Dcruz, Health Scientist
Population Health Informatics Fellowship Program
