The Honorable Kevin McCarthy
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

The Honorable Hakeem Jeffries
Minority Leader
U.S. House of Representatives
Washington, DC 20515

The Honorable Chuck Schumer
Majority Leader
U.S. Senate
Washington, DC 20510

The Honorable Mitch McConnell
Minority Leader
U.S. Senate
Washington, DC 20510

Dear Speaker McCarthy, Majority Leader Schumer, Minority Leader Jeffries, and Minority Leader McConnell:

On behalf of the undersigned organizations, we urge you to enact legislation that provides permanent protections for “Dreamers” who came to the U.S. as children, built their lives here, and are American in every way except for their immigration status. Their contributions to the U.S. health and biomedical workforce are invaluable, particularly to the individual patients they serve on a daily basis, but are threatened by judicial uncertainty and regulatory impermanence.

Currently, 34,000 Deferred Action for Childhood Arrivals (DACA) recipients – physicians, nurses, dentists, and many others - provide health care to patients in communities across the nation.1 Meanwhile, the Health Resources and Services Administration (HRSA) estimates that 99 million Americans live in primary care Health Professional Shortage Areas (HPSAs), 70 million live in dental health HPSAs, and 158 million live in mental health HPSAs.2 To put it in perspective, at least 17,000 primary care practitioners, 12,000 dental health practitioners, and 8,000 mental health practitioners would be needed to serve these areas to eliminate their shortage designation.3 In light of these nationwide health workforce shortages, the DACA program and its corresponding work authorizations are critical to retaining and expanding our nation’s health workforce and health care capacity.

Recent court rulings have left the DACA program in legal limbo. Last year, the Fifth Circuit Court of Appeals upheld a ruling by a Texas federal district court that blocks new requestors from attaining DACA.4 On January 30, a coalition of nine states asked the same Texas federal district court to end the program. Conversely, national organizations representing a wide range of health professional education groups filed a 2019 amicus brief to the U.S. Supreme Court in

The fate of DACA in the courts remains unclear – as such, Congress must act to provide the permanent stability to the Dreamers who have earned a pathway to citizenship.

Since the Dream Act’s first introduction in 2001, there have been bipartisan efforts to authorize protections for Dreamers. Senators Dick Durbin (D-Ill.) and Lindsey Graham (R-S.C.) reintroduced this bipartisan bill in the 118th Congress and called on Congress to provide Dreamers a permanent pathway to citizenship. Despite support from 85 percent of Americans, including almost 75 percent of Republicans, Congress has yet to pass such a solution.5 Passing legislation with permanent protections would allow 34,000 health care workers and nearly 600,000 current DACA recipients to continue their current education, training, research, and employment.6

Health professionals with DACA encompass a diverse, multiethnic population, who are often bilingual and more likely to practice in rural and underserved communities. They are practitioners who provide a tremendous resource to patients who often have challenges with access to health care services or with communication barriers. According to a 2019 survey of Dreamers interested in health careers, 97% expressed plans to ultimately work in the neighborhoods in which they grew up, or other underserved areas.7 That number is consistent with other studies demonstrating that individuals who are underrepresented in health professions are twice as likely to pursue careers working with underserved populations. DACA recipients already serve in nursing, psychiatry, medicine, dentistry, research, and other frontline health professions, all of whom protect and care for our most vulnerable patients in different communities across the nation.8,9 Indeed, the positive impact of DACA recipients in health care spans all 50 states and the District of Columbia.

Our organizations are dedicated to strengthening our nation’s health and biomedical workforce to improve health outcomes for all and meet the unique, often unmet needs of patients in communities across the country. Retaining the DACA program helps us reach those goals and supports the health workforce during a time when we can ill-afford to lose valuable, well-trained, and qualified personnel. We urge Congress to provide Dreamers with an opportunity to earn lawful permanent residence in the 118th Congress.

Thank you for your continued support of our health workforce, and all who comprise it.

Sincerely,

Academic Pediatric Association
