

## **Planetary Health Education Framework**

Interconnection within nature	Shift the mindset from being separate from nature to the inner-connection with nature, expanding the ways of knowing to include recognition of indigenous people and diverse traditions.
Anthropocene and Health	Understanding of how changes in the planet are connected to health outcomes
Systems Thinking and Complexity	Complex problems require systems based thinking and approaches
Equity and Social Justice	Disparities and eliminating structures that now and in the future, disproportionately impact some while others are unaffected.
Movement Building and Systems Change	New tools, action and intentional change is needed to impact move to innovative solutions that are sustainable.
